Equivalent To Bachelor Degree  
**IDF's Computing And Cyber**  
**Defense Academy**  
Israel

## Certifications

- Database Design, John Bryce College
- Android Application

# Oz Abohazira

## Professional Summary

Frontend-focused software developer with over 9 years of experience, specializing in modern web technologies, including Angular, React, TypeScript, Tailwind and component-based architecture. Proven track record in building responsive applications with comprehensive testing strategies and AI-assisted development workflows.

## Experience

### SDF-Tech - System Specialist

Forsyth, GA

01/2025 - 08/2025

- Served as the primary technical escalation point for connectivity and system faults, resolving complex multi-system issues.
- Streamlined system preparation process for large-scale deployments, reducing setup and configuration time from 4 weeks to 2 weeks through process automation, warehouse inventory tracking, standardized checklists, and pre-configuration of network connectivity and VPN settings.
- Personally designed and implemented a centralized monitoring application that tracked every site and device, generated automated reports, and provided real-time system health statistics across the state.
- Developed innovative network configuration solutions to bypass router whitelist restrictions, enabling seamless testing, and eliminating multi-day connection delays.
- Built a remote diagnostics and repair station in the warehouse, allowing off-site troubleshooting, and significantly reducing costly field visits.
- Independently learned and mastered the Guardian system's software, hardware, and network configurations, enabling rapid issue resolution without escalation to overseas teams.

Key Technologies: Python, React, network configuration, VPN, server setup, hardware diagnostics, system monitoring, process automation, remote troubleshooting, and inventory management.

### Rebillia Platform - Front End Developer

Roswell, GA

01/2024 - 01/2025

- Developing the front end of SaaS software using technologies such as Angular, React, TypeScript, Bootstrap, SCSS, HTML, Tailwind, JavaScript, and RESTful API paths and endpoints to develop front-end app solutions.
- Applied responsive design principles to ensure consistent display and functionality across a wide range of devices, including mobile phones, tablets, and desktop computers.
- Designed user experience and product flows to optimize user engagement,

- Development, Hacker-U College
- SAPUI5, John Bryce College

## Languages

- without compromising ease of use, and meaningful interactions.
- Utilized version control systems such as Git and Jira to track changes throughout the development process.
  - Integrated AI development tools, including GitHub Copilot, to enhance productivity while maintaining code quality standards.

### Israel National Insurance Institute - SAP ABAP Developer Lead

*Jerusalem, Israel*

*05/2021 - 05/2023*

Directed a team of seven software developers to create and maintain real-time applications.

- Facilitated work discussions to identify solutions and enhance operational processes.
- Managed configuration control for projects, including environment transfers, and content consolidation.
- Mentored junior staff to cultivate leadership skills and support career advancement.

### Israel National Insurance Institute - Senior SAP ABAP Developer

*Jerusalem, Israel*

*07/2020 - 05/2021*

- Led characterization and development of employment period calculation project, resulting in 75% cost savings compared to previous methods.
- Developed applications using SAP UI5 technology, JavaScript, and CSS, integrating standard tools for enhanced functionality.
- Enhanced data accuracy through comprehensive validation measures during application development.
- Utilized ALV interactive and non-interactive reports to deliver actionable insights.

### IDF Mazpen Unit - SAP ABAP Developer

*Central, Israel*

*03/2015 - 02/2020*

- Developed reusable classes and methods to enhance productivity and data integrity organization-wide.
- Conducted comprehensive unit testing on developed components to guarantee high-quality deliverables.
- Utilized BDC programming and LSMW for program development across various modules, including Payroll.
- Engaged with multiple cross-functional teams to implement solutions effectively.
